
Effect of Tipped Minimum Wage on Percentage of Sexual Harassment Charges from Restaurants.

Explanation: Dependent variable is the percentage of sexual harassment charges in a given state/year from full-service restaurant. Regression also includes controls for state fixed effects and is weighted by the state's number of sexual harassment charges. T-statistics are given in parentheses.

State's tipped minimum wage	0.693** (3.00)
State's minimum wage	-0.171 (-0.67)
Year dummies: (2007 excluded)	
2008	-1.427*** (-3.78)
2009	-2.255*** (-5.41)
2010	-2.061*** (-4.41)
2011	-2.502*** (-5.32)
2012	-2.783*** (-5.83)
2013	-2.816*** (-5.86)
2014	-3.573*** (-7.21)
2015	-3.819*** (-7.39)
2016	-4.191*** (-7.77)
2017	-4.376*** (-7.61)
Intercept	5.139*** (3.85)

t statistics in parentheses

* $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$
